

# BAHAA ALDEEN MOHAMED

Senior .NET Full-Stack Software Engineer

Alexandria, Egypt | [+20 01284586608](tel:+2001284586608) | [BahaaMohamed37@gmail.com](mailto:BahaaMohamed37@gmail.com) | [linkedin.com/in/bahaamohamed-dev](https://www.linkedin.com/in/bahaamohamed-dev)

## PROFESSIONAL SUMMARY

Results-driven Senior Full-Stack Software Engineer with 3+ years of hands-on experience in .NET ecosystem development. Proven track record of delivering scalable web applications, modernizing legacy systems, and implementing enterprise-grade payment solutions across multinational markets. Expert in Clean Architecture, CQRS, Mediator patterns, and microservices design. Demonstrated leadership in mentoring teams on AI-driven development practices and driving performance optimizations that enhance system reliability. Cisco IT Certified professional with comprehensive expertise spanning C#, ASP.NET Core, Web API, SQL Server, Entity Framework, Dapper, Angular, and React. Currently advancing expertise in Azure Cloud Services and Microservices Architecture.

## TECHNICAL SKILLS

|                            |                                                                                                           |
|----------------------------|-----------------------------------------------------------------------------------------------------------|
| Languages & Frameworks:    | C#, .NET Core, .NET 9, ASP.NET MVC, ASP.NET Web API, Entity Framework Core, Dapper                        |
| Architecture & Patterns:   | Clean Architecture, CQRS, Mediator, Repository Pattern, Strategy Pattern, Pipeline Pattern, Microservices |
| Database & Caching:        | Microsoft SQL Server, LINQ, Redis, RabbitMQ, Query Optimization                                           |
| Frontend Technologies:     | Angular, React, HTML5, CSS3, JavaScript, jQuery, Ajax                                                     |
| Cloud & DevOps:            | Microsoft Azure, Azure DevOps, Azure Team Foundation, Git, CI/CD Pipelines                                |
| AI-Assisted Development:   | Claude AI, Claude Code, GitHub Copilot, Vibe Coding, AI-Powered Code Generation                           |
| IDEs & Tools:              | Visual Studio, Visual Studio Code, JetBrains Rider, SQL Server Management Studio, Postman                 |
| APIs & Integrations:       | RESTful APIs, Payment Gateway Integration, Google Maps API, SMS/Email Services, JWT Authentication        |
| Practices & Documentation: | Agile/Scrum, Technical Documentation, Mermaid Diagrams, API Documentation, Fluent Validation, OOP, SOLID  |

## PROFESSIONAL EXPERIENCE

### Senior Full-Stack Software Engineer | Andalusia Business Solutions

November 2025 - Present | Alexandria, Egypt

- AI-Driven Team Leadership:** Mentored and guided development team members in leveraging AI tools and best practices, resulting in enhanced productivity and improved code quality across the development workflow.
- Complex Bug Resolution:** Diagnosed and resolved critical system bugs across multiple modules, significantly improving system stability and user experience for enterprise clients.
- Feature Development:** Designed and implemented new features across multiple modules, expanding system functionality, and meeting evolving business requirements.
- Performance Optimization:** Implemented performance enhancements that improved application responsiveness and reduced system resource consumption across the platform.
- Technical Documentation:** Created comprehensive documentation for complex API endpoints and module workflows using Mermaid diagrams (flowcharts, sequence diagrams) in Markdown, ensuring clear system understanding for the development team.

### Senior Full-Stack Software Engineer | PS Digital

March 2023 - November 2025

- **Framework Modernization:** Successfully upgraded enterprise projects to the latest version of C# and .NET, implementing CQRS and Mediator design patterns that improved code maintainability, testability, and separation of concerns.
- **Payment Gateway Middleware:** Architected and developed a comprehensive middleware reverse proxy solution for payment gateway integration across 9 countries, utilizing Clean Architecture, CQRS, Strategy Pattern, and Pipeline Pattern for scalable, maintainable code.
- **Solution Architecture Documentation:** Contributed to the creation of comprehensive solution architecture documents, including detailed architecture diagrams and workflow designs.
- **Third-Party Integration:** Integrated payment providers, email services, SMS gateways, Google Maps, and Google reCAPTCHA for enhanced security and seamless user communication.
- **Website Development & Maintenance:** Built new websites from scratch and maintained existing web applications, ensuring optimal performance, user experience, and code quality through systematic refactoring.

### Part-Time Backend Software Engineer | MEEM Development

July 2024 - November 2024

- **Solution Architecture Documentation:** Contributed to the creation of solution architecture documents including detailed architecture diagrams and workflow designs.
- **SRS & LLD Documentation:** Assisted in drafting Software Requirements Specification (SRS) and Low-Level Design (LLD) documents, ensuring clear and comprehensive project guidelines.

### Full-Stack Developer | PS Digital

March 2023 - September 2024

- **Application Modernization:** Led the complete rebuild of an existing MVC web application into a high-performing .NET 9 Web API, improving scalability, maintainability, and overall system health.
- **Database & Backend Overhaul:** Redefined database structure and rebuilt backend architecture to align with modern development best practices.
- **Performance Optimization:** Switched from Entity Framework to Dapper, significantly enhancing query performance and simplifying data operations.
- **Azure Migration:** Assisted with migrating the application to a secure Azure platform, utilizing Azure cloud services for efficient data processing and storage.

## EDUCATION

---

### Full Stack Development using .NET Framework Diploma | Information Technology Institute (ITI)

November 2022 - March 2023

- Established a strong foundation in computer science fundamentals through a demanding 4-month boot camp specializing in the Microsoft Tech Stack.
  - **C# & .NET Framework:** Built web applications and APIs with proficiency in C# on the .NET Framework.
  - **SQL Server:** Developed expertise in designing and managing relational databases using SQL Server.
  - **Angular:** Created dynamic and user-friendly web interfaces using the Angular framework.

### Tourism Studies | Alexandria University

February 2014 - February 2019

- Equipped with a foundation in tourism studies from Alexandria University, bringing a multifaceted perspective to problem-solving.

## PROFESSIONAL DEVELOPMENT (IN PROGRESS)

---

### Microservices Architecture Diploma | Steps Learning Academy

Comprehensive training in microservices architecture design and Angular frontend development for building scalable, distributed systems.

## Azure Cloud from A-to-Z Diploma | Steps Learning Academy

*In-depth training in Microsoft Azure cloud services, including deployment, management, security, and best practices for cloud-native application development.*

### CERTIFICATIONS
